

ACROSS THE INTERNET **CRIMINALS STEAL** FROM
SMALL, MEDIUM AND LARGE COMPANIES **EVERY**
HALF MINUTE OF EVERY DAY.

**Digital
Bodyguard
Security**
(DBS)

SECURITY RESOURCE GROUP INC.

Digital Bodyguard Security

INCLUDES:

Threat Intelligence

We scan all layers of the internet and identify any activity associated with you and your company. We give you real time – 24/7/365 - monitoring and alert you to any problems.

We Look for:

- Indications your company may have been compromised
- Signs your information is being traded for profit or will be used against you
- Information or malicious behaviour that can affect your reputation and corporate brand.

We Deliver:

- Continuous scanning and monitoring - 24 hours a day/7 days a week/365 days a year
- Notification of risks
- Threat analysis and mitigation recommendations
- Regular reviews & reporting.

You Get:

- Corporate Brand/Reputation Protection
- Data and information Protection
- Identification and investigation of threats
- Quick detection = quick response.
- Safety online - just like you expect in your everyday life.

Security Education, Training and Testing

While your employees are your greatest asset, they are also your biggest risk as it relates to security breaches and ransomware.

Eighty per cent of reported security incidents result from phishing attacks.

Phishing is an attacker masquerading as a trusted entity, duping staff into opening an email, message or text. Once the email or message is open, attackers gain access to secure corporate information.

Protect yourself and your employees with DBS Security Education, Training and Testing - delivered through web-based modules.

We Cover:

- Phishing
- Email security
- Password safety
- Internet protection
- Malware.

We test employees via emails disguised as phishing – if they click on the email, they are immediately notified of their error with an explanation and redirect for further education.

We provide detailed reports and trends to clients to monitor progress.

We Deliver:

- Web based education/training
- 2 times/year phishing campaign (testing)
- Additional training is available
- Summary report.

Benefits:

- Educate employees and improve awareness
- Protect assets
- Reduce risk of an attack
- Reduce downtime.

SRG HAS BEEN PROVIDING CYBER SECURITY SERVICES FOR OVER 15 YEARS

ALSO AVAILABLE:

Cyber Incident Response Team (CIRT)

What happens if we find you've been compromised? Does your team have the skills to address these challenges? Our CIRT team will get you back on track.

Technical Incident Response

If there's a data breach or leak, we immediately investigate and start remediation.

We Provide:

- Consulting to provide a path for a more secure environment
- Vulnerability and Pen testing
- Consulting services
- Cyber forensics – what did the criminals get access to and steal?

Legal Incident Response

Managing risk is critical if you are breached.

- Our independent legal cyber experts will advise on how to manage situations like fraud, IP/identity theft or copyright infringements, to name a few.
- We can also help with your provincial regulatory and Privacy Officers and prepare legal action if required.

Reputation Incident Response

You've been compromised – what do you tell customers, stakeholders and employees?

How do you protect your reputation and convince everyone you can be trusted in the future?

We give you communications strategies, tools and content to properly inform stakeholders and employees.

We'll also help with social media. Many companies don't know what's being said about them on all layers of social media until we uncover it - and you don't know the damage that's being done.

We uncover negative content and use our independent Reputation Management team to:

- Improve online reputation
- Create positive content.

When you are under attack it is important to be proactive, transparent and timely to protect your reputation.

Why SRG?

Concierge Service

Dedicated senior cyber analysts with a focus on proactively protecting you.

Skilled Threat Analysis

Detailed scans and reports – interpret the data.

Remediation Recommendations

What you need to do.

Reporting that Makes Sense

Convert technical detail into understandable information.
